5.	Ilino Brdo	road	B&H	on demand
6.	Kula	road	Kosovo	on demand
7.	Dračenovac	road	Serbia	on demand
8.	Ranče	road	Serbia	on demand
9.	Dobrakovo	road	Serbia	07:00 -21:00

The border veterinary inspection is organized at nine border inspection points.

The working hours are aligned with the working hours of the competent bodies of border veterinary inspection of the neighboring countries, as well as with the frequencies at the crossing points.

Border inspection posts are located near entry points of Montenegro and in areas determined by the competent authority for managing border crossing points.

All necessary conditions for inspection in accordance with EU regulations have not been provided at the border inspection points where veterinary inspection is organized, except at the border crossing points Debeli Brijeg and Božaj (and even these two points do not meet the requirements for transport of live animals and destruction of contaminated consignments of animal origin). At the newly built border crossing point Sukobin (with Albania) the border veterinary inspection has not been organized yet, although working conditions have been provided.

All border inspection posts have at their disposal basic equipment for sampling for routine tests, as well as proper equipment for rapid exchange of information with other border veterinary posts (direct phone lines, faxes, computers, internet connection), which has not been yet connected to the central information system.

Reconstruction or building of new facilities is planned for certain border inspection points in accordance with EU requirements on BIPs.

Montenegro has adopted a Strategy for Integrated Border Management, as well as an Action Plan for its realization. A network between the border inspection posts and the Department for Inspection Supervision within the Veterinary Directorate is planned to be established, as well as the creation of computer programs for tracking shipments at import, export and transit.
